

The way drinking water should be

Now available, the Annual Water Quality Report provides consumers with information about their drinking water. Portland Water District's dedicated team is proud of the great tasting, safe drinking water delivered to homes and businesses in the Greater Portland area.

We take great pride in serving water sourced from Sebago Lake, Maine's second-largest and deepest lake. Surrounded by forests, the lake is exceptionally pure and of such high quality that it is exempt from the filtration requirements set by the Safe Drinking Water Act. Only about 50 out of 13,000 surface water supplies across the country are able to serve unfiltered water.
